Don't Miss
Sundays
MOTA regular
season Event
Here!

A [twin-shock bike](#) must have the following to qualify: Twin shocks, air-cooled, drum brakes, and cable clutch.

NOTE - There will NOT be an air-cooled mono class this year due to poor participation at last year's event.

Trials Incorporated (our trials friends to the south) will be including this event as a qualifying round as part of their Vintage Cup series. Information on TI's vintage cup series can be found on the internet at [trialsinc.org](#)....check it out, it's a great series to get involved in.

Camping is allowed and port-O-lets available. Trophies will be awarded for top finishers. Section difficulty level will be comparable to Novice/Intermediate lines...But, at the discretion of the event Referee(s), selected and/or "advanced level" riders will be asked to ride the designated "Equalizer" gate/section marker splits. The difficulty level of the Equalizer line* will be comparable to Sportsman lines at local events.
